Track Consumables and Costs

- Track fuel used by equipment
- Track drill and impact hours

Monitor Safety and Compliance

- Perform MSHA compliant exams
- Publish safety shares

Get Stuff Done. Faster. Safer.

quarryHog is a comprehensive fleet management system for small mines, quarries and aggregates. It optimizes production and maximizes utilization by leverages real-time data and GPS tracking.

On top of productivity, quarryHog also boosts safety, as it boasts a sleek digital inspection system that allows for high level maintenance ops. Not only does this increase safety, it allows for quarries to get the absolute most out of their equipment.

quarryHog Desktop

Through the quarryHog opsCenter, supervisors can monitor and assign tasks in real-time to operators. Shifts are reported on as the progress and supervisors are able to make impactful, second-by-second, adjustments. This allows for easier scheduling of safety inspections, eliminated downtime and a boost in haulage.

quarryHog Mobile

With quarryHog mobile, operators can see tasks assigned to them the second they are assigned. They can also record consumable usage, report progress, and make real-time adjustments to fine tune productivity.
