

# SIMPLE, POWERFUL **SMALL** MINE, QUARRY AND **AGGREGATE** MANAGEMENT SOFTWARE

## Get Stuff Done. Faster. Safer.

quarryHog is a comprehensive fleet management system for small mines, quarries and aggregates. It optimizes production and maximizes utilization by leverages real-time data and GPS tracking. On top of productivity, quarryHog also boosts safety, as it boasts a sleek digital inspection system that allows for high level maintenance ops. Not only does this increase safety, it allows for quarries to get the absolute most out of their equipment.

### Key Features

1

No dispatch required fleet management system.

2

Track haulage and cycle times, instantly and digitally.

3

Monitor equipment location in real-time and keep track of all consumables through quarryHog mobile.

4

Conduct MSHA compliant workplace exams, pre and post op exams and manage timesheets.

# Monitor Equipment Locations at All Times

## Use Cases

1

### Optimize Production

- Monitor all production in the pit
- Review shift logs
- Monitor tons/truckloads

2

### Maximize Availability and Utilization

- Manage crew activity
- Maximize equipment utilization
- Perform inspections

3

### Track Consumables and Costs

- Track fuel used by equipment
- Track drill and impact hours

4

### Monitor Safety and Compliance

- Perform MSHA compliant exams
- Publish safety shares

## quarryHog Goes Where You Need It

### quarryHog Desktop:

Through the quarryHog opsCenter, supervisors can monitor and assign tasks in real-time to operators. Shifts are reported on as the progress and supervisors are able to make impactful, second-by-second, adjustments. This allows for easier scheduling of safety inspections, eliminated downtime and a boost in haulage.

### quarryHog Mobile:

With quarryHog mobile, operators can see tasks assigned to them the second they are assigned. They can also record consumable usage, report progress, and make real-time adjustments to fine tune productivity.
