

quarryHog for Supervisors

Capable, Dependable, Flexible, Responsive, Fast

quarryHog is a comprehensive fleet management system for small mines, quarries and aggregates. It optimizes production and maximizes utilization by leverages real-time data and GPS tracking. quarryHog also boosts safety, as it boasts a sleek digital inspection system that allows for high level maintenance ops. On top of increasing safety, this allows for quarries to get the absolute most out of their equipment.

Monitor Equipment Locations at All Times

quarryHog integrates with next-level technology to track the precise location of equipment, helping to optimize current shifts and plan upcoming shifts. Integrated with the production scheduling and control system, quarryHog's real-time location tracking system integrates with a GPS transponder overlaying real-time location information of equipment over a navigation display.

quarryHog OpsCenter

Through the quarryHog opsCenter, supervisors can monitor and assign tasks in real-time to operators. Shifts are reported on as the progress and supervisors are able to make impactful, second-by-second, adjustments. This allows for easier scheduling of safety inspections, eliminated downtime and a boost in haulage.

Real-Time Production Monitoring

Outputs from equipment and infrastructure are integrated to deliver insights. quarryHog's intelligent analytics system presents workers with easy-to-understand data, empowering operations to optimize plans. Using machine learning, analytics systems understand your quarry or mine. For example, they help automatically release a renewed schedule after disturbances in operations.

WHY QUARRYHOG?

24x7 Real-Time Access

The moment new data is entered or a form is uploaded, you can access it anywhere. Never be without the data you need data again.

Online/Offline Functionality

Take quarryHog anywhere you need it. Safety and productivity don't have to stop where the wifi does.

World-Class Support

We're right by your side for anything you might need. From setup to feature requests, we want quarryHog to fill your needs.

Get The Most from Your Quarry

quarryHog lets you tap into the potential of your quarry and personnel. Give yourself the tools to reach previously unattainable goals.
